THE BULLS AND BEARS

IN THE BULLS AND BEARS

Nip and Tuck Which Should Be the Winner.

IN THE KOOTENAY COUNTRY

MAJOR J. E. JACKSON INVESTS IN BRITISH COLUMBIA MIXES.

Twelve Ben at Work Developing His New Acquisition—Hon. A. W. Mc.

The Kootenay is a comparatively new with the solution of the country are concerned.

The Kootenay is a comparatively new with the comparative of the comparative of the country are concerned.

"This is mighty good for surface ck," remarked Felix Stark to a Her-

interested,

log of this locality Mr. Warner states that it is well mineralized,
and that the deposits give encouraging
indications of being rermanent. He in
especially well pleased with the group
located by him in that locality, and is
satisfied that with such a surface showing it will take but a small amount of
work to open up a paying mine. The
formation, Mr. Warner states, is a
contact between a porphyretic-granite
and from and the quartz has a lively,
healthy appearance.
In the same locality there are other
prospects, some of which have been
note or less developed, and the showing on these is all that could be desired.
According to all accounts Box Elder
county is destined to come to the front
within another year, and it is believed
that next season a large amount of
development will be done in prospecting
the internal deposits of that region.

The Mercur Gold Relt.

Excitement still keens up regarding the western slope, is Camp Floyd min-ing district, and there is hardly a day but that some innoctant discovers in that locality is reported, the latest be-ing that while assessment was being done last week on the projecty ad-joining the Omaha on the east, owned by the Mercur Gold Belt Mining com-pany, a body of ore had been uncovered that gave average assay values of over \$29 in gold to the ton, beside some sil-ver.

Security of the control of the contr

mence to sick our shaft, and will not sten until the 1,500-foot level has been reached. The starting up of the mine has revived Basis, which, I think, in time will be a second Butte.

Mining Notes and Personals.

Hon. G. W. Nebeker will leave in the morning for Ophir.

A carload of Galena and Utah ores have been received at the samplers.

Colonel Nick Treveesk has returned from Denver, where he has been to attend the burial of an old friend.

Frank Dalton, who came in from the

Frank Dalton, who came in from the mins Thursday evening, became the happy tather of a fine bouncing boy on Friday morning, and now there is joy in the Dalton household.

happy tather of 4 me bouncing soy on Friday morning, and now there is joy in the Dalton household.

The drift of the Hecla, at Mercur, is getting into ground that is making it exceedingly interesting for the owners of this property, and it is said that it cannot be long now before the workings are in may ore.

Another shipment of ore from the Hefner Queen mine, in Dry canyon, Ophir mining district, is expected within a few days. The Hefner Queen, from all accounts, is showing up in a most satisfactory manner.

Manager George Dern of the Mercur mine will go out to Mercur this morning for the purpose of getting the time at the mine and the mill for the pay rell, and it is possible that he will make a shipment of cyanides while there. The Herald is informed that a party of eastern capitalists has taken a bond and a lease on the Lydia Nos. 1, 2, 3 and 4 claims in Camp Floyd district, adjoining the Omaha group on the west dip, and that it is the intention of the lessees to begin the development of the property within a few days.

A shipment of ore from the Silver King extension, in Mineral guich, Big Cottonwood canyon, was received at the samplers yesterday and it is the intention to make another consignment as soon as the weather moderates. Otto Hudson, the manager of the company, expects to go up to the mine this morning.

The Herald is informed that the

expects to go up to the mine this morning.

The Herald is informed that the Eagle mine at Marysvale, which adjoins the Wedge on the east, is the making of one of the most valuable properties in the district, and that within the next few days active development work will begin on this claim, which, it is claimed, will open out into a regular shipper in the spring.

A mining operator who is well posted regarding the discoveries made on the western dip, in Camp Floyd district, and their value, informs The Herald that with the showing for ore in this locality and the developments made at Mercur, there is no reason to doubt the assertion that Camp Floyd district will yet develop into the greatest gold camp in the world.

The Corey brothers of Ogden are

Mercur, there is no reason to doubt the assertion that Camp Floyd district will yet develop into the greatest gold camp in the world.

The Corey brothers of Ogden are pushing through a mammoth enterprise near Island mountain, about 75 miles from Elko, Nev., and it is stated that these genitemen are now employing a force of about 300 men in the construction of dams and reservoirs and in the company is the owner of a larke area of placer diggings, besides some valuable quarts ledges, and it is the intention to develop these on a larke scale.

D. R. Brown of Boise, Ida, who is in the city, informs The Herald that in the Willow Creek country there is a great deal of activity at the present time, and that it cannot be very long now before this region will come to the front as one of the greatest producing sections of this great mineral state. Mr. Brown is now working the Silver Spray mine, at Willow Creek, which is embraced in the Birthday group, which is considered as one of the most promision properties in the district. The Silver Spray mine, at Willow Creek, which is embraced in the Birthday group, which is considered as one of the most promision properties in the district. The Silver Spray mine, at Willow Creek, which is embraced in the Birthday group, which is considered as one of the most promision properties in the district. The Silver Spray shows large bodies of both high grade and low grade ores, and Mr. Brown is satisfied that in this ground he has a veritable bonama.

Work has been resumed in the development of the Plinto mine, formerly known as the Portland, not far from the incorporation of the Plinto monapa a double-compartment shaft has been sink on the property of the company to a depth of Ti feet, and now it is the intention of the company to go on down to the loop-fort leven, when a fair will be run to the ledge. The Pinto group lies up against the great lon mountain concerning which so much has been said in the prevailing belief that this mountain of the nore is the mother of the deposits of the o

cliries in this city during the past few treather. The strike on the Mercur Gold Beit was made in the face of a 20-foot tunnel at a vertical denth of about 26 feet from the surface, and it is stated that the values were obtained from average samples taken from across the entire ledge as uncovered in this diff.

THE HOPE MINE.

Property to the Extensively Developed Under New Management.

The Hope mine, at Basin, Mon, which is now being developed by Dr. D. A. H. Franklin of this city, promises to spen out into one of the greatest witnes in that stated profile producers and it is stated that the orspecty in the state of profile producers and it is stated that the orspecty in the country and has visited the leading mines of the Pheride slope and also of Mexico. Mr. Edelsten is of the opinion that the ores of the Silver King will carry average values of \$250 to the 70 to 10 to 10

Swansen-Work Resumed in the Development of the Pinto-Oce and Bullion-Silver and Lead

There is not a mining man in this city who has been here for the mark six years who does not recall the excitement that followed closely upon the heels of the discovery of the Datton mine at Maryavale, in Prute county. It was not long after its discovery before a company was incorporated for the operation of the property and it was not many days after the stock of the company was put upon the market at 25 cents before it was quoted at 40, then 50 and finally up to 50 cents and then \$1; and then the bubble burst, for the body of high grade ore had been lost, and although the company had erected a mill for the treatment of its low-grade ore, the process proved to be a failure, and it was two months before the stock was quoted at 50 cents once again, and step by step it has since suffered a decine until a short time ago when it could have been picked up at almost a song.

Instead of paying dividends the Daiton has been paying "chloride of assessments" during the past five years, and during all this time there has been more than one man who expressed the belief that the lost lodge would be found in time, and this belief has been strengthened since the company gave a lease on the property a few months ago to Dalton and Perguson, the two men, of all others, who should know about the intricacles of this mine, as they were familiar with it in its oulmest days; and if anyons knew where the lost vein was to be found, they would know.

out of the mine before their lease expires.

Some of this ore has been tested by interested parties by my and it has been shown that it carries vitues of 1250 in gold to the ton, besides some in silver; and average samples of ore taken from the ledge and sacked went all the way from 120 to 24 in gold to the ton, besides from 1 to 20 cances in silver; but it is believed that the oresent shitoment, which has been hand sorted, will go from \$100 to \$250 in gold to the ton.

THE LINE REPAIRED.

palting the Silver King pipe line was completed this afternoon at 1:30 o'clock, when word was telephoned to the secbeen made, and that they wanted to know in a half hour whether or not the water would ran. At 2 o'clock the secretary was notified that the water was running and filling the tanks. At that hour he could not state when the that hour he could not state when the men would go on shift, as Messra. Keith and Kearns were both in Coalville looking after legal matters connected with the frouble. Mr. Scott, the secretary, states that the pipe line was torn up not only on the McGregor group, but also on land not owned by McGregor nor the Crescent company. He thinks, however, that this was a mistake of the men who did the work. A party of Silver King miners went up to the ground this meruing to assist in repairing the pipe line.

Silver at the board was neglected.

Trading at the stock exchange today, as usualled late, was entirely professional. In the early dealines the market was barely steady, but sinsequently on moderate selling the leading leasure yielded fractionally. The selling was bissed on the post selling of the Pennslyvania system for October, a belief that the returns of the western roads for the fourth week of the current month will be unfavorable on account of the znew blockades, and lower cables for American securities from Leedon. Later on the active baues improved slightly, the October statement of the St. Paul road having proven a little better than generally expected. For the month named the decrease in met earnings was 1397.413. The read was operated for 53.72 per cent against 50.46 per cent for the corresponding period in 1855. In the last hour of business the traders became more aggressive. Sugar and Jorsey Central were the objective points. The last named was raided down from 1.17% to 1.15%. This stock was hammered by the traders on the amouncement that the Williamsburg refineries had not resumed operations. Manhatian, the grangers. Consolidated Gas, New York Central were the objective points. The last named was raided down from 2.12% to 1.61. Coughs are cured as they were 50 years ago

Ayer's Cherry Pectoral has no equal as a remedy for coughs, colds, and lung diseases. Where other soothing elixirs palliate, Ayer's Cherry Pectoral heals. It is not a cheap cough syrup, which soothes but does not strengthen; it is a physician's cough remedy, and it cures. It is put up in large bottles, only, for household use. It was awarded the medal at the World's Fair of ninety-three.

50 Years of Cures.

It has a record of

Chicago General Markets.

Chicago, Nov. 18.—The wheat market was a strong one for a mark of the morning, an easier tone then becoming prominent and prices alumning from the early high points. Laverpool cables, which were from unchanged to 19st, higher at the opening, and light northwest receipts, 400 cars amins 7.70 last Monday, and 1.512 a year ago, caused the initial hardness in the tone, but the heavy world's shipments for the week, estimated at \$33,000 bushels, kept buyers from displaying too much enthusiasm. Receipts at Calcago were 15 cars, and 25s.35 bushels were taken from stock. The amount on ocean passage increased 20,000 bushels. The visible supply decreased 1,050,000 bushels. The visible supply increased 1,500,000 bushels. The visible supply increased 7,5000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official report of the world's shipments made the amount 7,500,000 bushels. The official reports over the first samulated and the samulated from \$20,000 bushels. There was a rally of about 1 cent in the last 15 minutes, shorts covering freely.
